**AXA Power
– 400 Hz Ground Powers Units**

AXA Power is the leading supplier of 400 Hz solid-state Ground Power Units with more than 6.000 units in operation in leading airports world-wide. We provide 400 Hz units to all kinds of aircraft including the new all-electric version. We focus on simple and reliable solutions that are easy to maintain thus ensuring minimal disruption to aircraft departure schedules.

Today AXA Power sets the standard of solid-state Ground Power Units. As advisers to the industry we are ready to assist you from the planning phase to operation. We provide expert project management and after-sales service. After negotiations, handshakes and delivery... We are there for you!

**AXA 2300 Compact
– Solid State Ground Power Units**

The AXA 2300 Compact is the safe choice for new and existing 400 Hz installations as it is designed to suit the increasing demands of future aircraft, including the new all-electric version. The AXA 2300 is provided with a Plug & Play facility - a unique and revolutionary way of compensating for voltage drop in distribution cables. The AXA Plug & Play system automatically identifies all relevant cable parameters to determine the voltage drop and controls each phase individually as a function of any load characteristic.

The AXA 2300 incorporates many outstanding features including a simple user interface which makes operator training easier than ever before.

The highly versatile AXA 2300 Compact is easily configured for apron, bridge or mobile configurations.

AXA Power Coil

The AXA Power Coil is a 90 kVA, 400 Hz GPU and a cable retriever in one and the same enclosure. It is the optimal choice for bridge-mounted configurations. Designed as a simple, encased unit, the AXA Power Coil is less susceptible to adverse effects from exposure to the elements, such as the sunlight and harsh weather. This minimises the overall cost of maintaining the unit. The coiling speed is 40 m/min., therefore the connection of the Power Coil to the aircraft is quickly established. Furthermore, the AXA Power Coil space and weighs up to 40 % less than most traditional GPU/coil solutions.

**Recent Major Airport
and Hangar Projects**

Some recent projects to which we have provided equipment and services:

- BAA Stansted Airport
- BAA Gatwick Airport
- BAA London Heathrow
- Jersey Airport
- Vnukovo Airport
- Avinor for Bergen Airport
- Dublin Airport
- Singapore Airlines
- Oslo Gardermoen Airport
- Bangalore International Airport

THE SAFE CHOICE

PRODUCTS

- 400 HZ Solid State Ground Power Units
- 28 VDC Ground Power Units
- AXA Power Coil
