COWI - a leading airport and aviation consultant

Our customers have different needs and we have undertaken projects for state-owned airports, privatised airports, airlines, airport investors and contractors.

More than 600 airport and aviation projects form the basis for our experience and services in planning, design, construction management, operation and maintenance.

Recent major airport projects comprise all phases from master planning to construction supervision of Muscat and Salalah International Airports in the Sultanate of Oman, master planning and

conceptual design of Hyderabad Airport in India, design review and construction supervision of the new runway at Sofia Airport, Bulgaria.

In February 2009 a strong team including COWI, NSW and Norconsult won the tender for a several billion N-Kr. expansion of Oslo Airport, Norway.

COWI has 4,500 employees which provide state-of-the-art services within the fields of engineering, environmental science and economics. This means that we cover all aspects of even the most complex and multi-disciplinary airport projects.

PRODUCTS

- Planning
- Conceptual design
- Preliminary design
- Detailed design
- Construction management
